1) Trauma: When you beat
a kid / person so bad they
have involuntary muscle move-
ment / smiles / errors in
operation (simple / slight or
major) BECAUSE self
preservation taught them
to FEEL OTHERS before / over
themselves (they must
appease the predator by being
stupid, so as not to insult or
threaten the predator ego) 2/4

They have to express / feel the predators emotions for them, instead of their own... how often... when & where depends on threat

② Tension - There is no
reason for people to be
FORCED awake early -
Tension can be disease -
Natural Early Birds are
a blessing, but sleep can
relieve a lot (at some
point, stretching can be better
than sleep, but merely
standing / sitting guard is
needless / boring / futile
disease ③ Movement - you
can move someone down a
specific path by punishing in
one direction (hateful antag-
onist in sight / approach
or sounding in one direction
and a reward or neutral
body / person leading toward
another direction; insisting
the newly agitated "Good
Idea") Cops make
money from Needless
Motion & False Narrat-
ives, chase your
traumatized & insecure
children all day! /// ④ Light
